Dear Micro-user,

IF YOU'VE GOT A TANDY TRS-80 I OR III; PET; APPLE II;  
SINCLAIR; DRAGON OR RML 380Z MACHINE - THEN YOU'LL BE  
ABLE TO LINK INTO MICRONET VERY SOON!

Thanks for your enquiry about Micronet 800. Sorry if it's been a while since you heard from us but we've been overwhelmed by the response! We now have you firmly logged on our system, and according to information you gave us, you have one of the machines listed above - which means you'll be one of the first on the system!

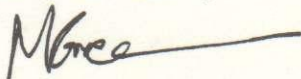

The new Micronet 800 service is just about ready for launch - and it's looking good, as you can see from the enclosed brochure!

The first users will be linking into Micronet within the next month - the BBC micro is the first to connect, closely followed by the computers listed above, and then most others throughout the year as we put the finishing touches to the software for each one.

We've registered you on our system as potentially one of our first 10,000 users, so you will qualify for our special offer prices: for most micros this is just £49 + VAT for all the software and hardware you need to connect to Micronet 800!

We'll be back in touch with you just as soon as your type of micro can be connected - and we look forward to welcoming you on Micronet 800 soon!

Yours sincerely,

Customer Sales Manager

P.S. Don't forget to let us know if you change computer - there are variations in connection methods and software.
